Increase business efficiency by engaging Dancik for System Audits

Professional Services are a key part of our comprehensive approach to helping you address operational challenges in your business. At Dancik International, we firmly believe that when technology is combined with the right services and training, an organization can maximize the value of its technology investment.

Accounting Audits

The goal of this service is to increase the efficiency of your accounting personnel by improving the way they utilize the Dancik Enterprise System. A Dancik Senior Financial Analyst will review your current system utilization and introduce industry best practices to your key financial employees. All audits are performed by degreed accountants who have extensive system and industry knowledge.

Major Focus:

- Promote major operational efficiencies.
- Identify key factors critical to successful business growth.
- Simplify business process through the reduction of redundant actions.
- Optimize resources including assets, materials, and finished goods through automated purchasing processes and material requirement information.
- Automate business processes, document creation, and calculations via paperless information flow.
- Increase customer satisfaction and sales via reduced response time in order fulfillment.

Major Benefits:

- Improved financial performance.
- On-demand ability to determine where the company stands in relation to profit goals and break-even points (your Key Performance Indicators).
- Measurable adherence to industry and governmental standards.
- Improved ability to evaluate the success parameters of new ventures and business expansion opportunities.

Dancik International Professional Services

SYSTEM AUDITS

Operational Audits

The goal of this service is to increase operational efficiency by improving the way your employees utilize the Dancik Enterprise System. A Dancik Senior Analyst will review your internal processes and interview key employees to recommend the most cost effective methods to improve your bottom line. An operational audit commences with our understanding of the established performance objectives for your firm, and agreeing to the standards and criteria for performance assessment.

Major Focus:

- Evaluate management's performance and conformity with policies and budgets.
- Analyze your organization and its operations, including appraisal of structure, controls, procedures, and processes.
- Appraise the effectiveness and efficiency of a division, activity, or operation of the entity in meeting organizational goals.
- Evaluate actual performance against targeted performance.

Major Benefit:

- A tailored report from the audit team that will indicate how well the activities are performed, suggest improvements, and offer other conclusions drawn from the audit.

Technical Audits

The goal of this service is to perform an in-depth analysis of your key business processes and to determine how well they are integrated with the features and functionality of the Dancik Enterprise System. Combining our expertise of our own applications and of the flooring industry, we can provide you with critical information necessary to streamline your processes such that you are positioned to take maximum advantage of key features and functions within the applications.

The goal of the Technical Audit is to allow you to maximize the use of the system by improving your ability to manage your business processes in the most efficient and cost effective manner possible.

Major Focus:

- Pre-planning review where Dancik will identify your most important concerns and formulate the meeting agenda.
- Conduct on-site audit.
- Identify under-utilized areas of the system.
- Tackle features that are easy to implement yet will gain high returns.
- Provide you with a follow-up document with conclusions from the audit, which may include further recommendations.

Major Benefits:

- Increased productivity.
- Increased accuracy.
- Increased visibility and use of information.

Dancik Technical Audits are performed by one of our experienced Business Analysts.
